One Way To Install Roxio To Get It To Work With The Blackberry Desktop Manger.

1) Install Roxio

2) Restart your computer

3) Now install the Blackberry Desktop Manger software **BUT** make sure when you get to the install (Select Type) you choose **Custom**.

4) Now find Media Manager and left-click on it and choose This Feature Will Not Be Available.

5) Then click on Next and finish the installation.

6) Restart your computer

7) To install Media Manger you will need to get your BlackBerry Desktop Manger cd, but DO NOT insert it yet.

8) Go to Control Panel then Add/Remove Programs.

9) Find the Blackberry Desktop Manger software and click on it one time and choose change or change/remove whichever one is presented.

10) This will start the installation wizard again and you will need to choose the option of Modify.

11) Now find Media Manger and left-click on it and choose This Feature, And All Of Its Sub features, Will Be Installed On The Local Hard drive.

12) Finish the installation and close all open windows.

13) Restart your computer

14) Now Roxio should work fine with the Blackberry Desktop Manager.
